

MODULE PRICE & ORDER - COLUMN QUOTE FORM INSTALLATION AND USER GUIDE

Summary

Thank you for choosing this Prestashop module. This module is a utility to display a column quote form to present your customers an opportunity to ask fast and easy quotes for their future (bulk) orders.

Installation

1. Upload the zip file you downloaded via the Back Office>Modules>Add a New Module tab then install.
2. You'll see a configuration link under the module's listing, click on it and open the configuration page.

Configuration

To fully operate the module, you should fill out all required fields under the Configure link.

- To change the site owner's (quote request recipient) address, enter your e-mail address.
- To change the "More Info" link, enter the link you like. Follow the directions in backoffice for other fields.
- To change the picture of the most ordered product, simply enter the picture's link. The link can be either from out of Prestashop folder (in this case, you should start with http(s):// prefix) or from within the Prestashop installation folder. Please follow the instructions provided.

Only the translations of Turkish, English and French files are available so far. You'll get an error if you want to operate this module under absent languages.

F.A.Q

1. Error - The following email template is missing:

Please add the appropriate mail template files under MODULE_DIR>mails folder for Prestashop 1.5 and above and MODULE_DIR>mails14 folder for Prestashop 1.4.

2. Can't receive mails

Please check your Prestashop mail settings. Suggested settings send with smtp and both html and text. Your language mail translation can be missing. Check mails and mails14 folder and add yours if missing.
